To Whom It May Concern:

The Monroe Local School District implemented a House Bill 264 energy efficiency project with Energy Optimizers, USA in 2016.

The project included upgrading the district's interior and exterior lighting, building automation and controls, HVAC repairs and enhancements, and kitchen equipment with more energy efficient systems. Interior and exterior LED lighting retrofits have been installed.

This project is expected to yield a savings of more than \$96,000 annually. Their team worked closely with our staff throughout the entire project. They worked quickly and efficiently to finish the project. We are very pleased with the results to date. After 11 months post-project, we have already experienced an 18% decrease in electric consumption and a 15% reduction in gas consumption, which is reflected in lower utility bills.

I highly recommend Energy Optimizers, USA as a provider of energy efficiency services, including LED lighting retrofits.

If you would like additional information about the company's work in the district, please contact me.
