To Whom It May Concern:

Energy Optimizers, USA recently executed an energy efficiency project with Portage Lakes Career Center. This project is expected to yield a guaranteed savings of more than \$16,000 annually.

The energy efficiency project included LED lighting retrofits as well as building controls and programming upgrades designed to make our facilities more comfortable. The project will reduce ongoing maintenance costs in addition to the savings we have experienced in utility costs.

The Energy Optimizers, USA team has worked closely with our staff throughout the entire project, and we are very pleased with the results and their responsiveness to our needs.

I highly recommend Energy Optimizers, USA as a provider of energy efficiency services, including LED lighting retrofits.

If you would like additional information about our experiences with Energy Optimizers, USA please feel free to contact me directly.

Sincerely,
